DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 05/04/2010 has been entered.

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Response to Amendment

The Amendment, filed on 05/04/2010 has been entered and acknowledged by the Examiner.

Claims 1-9, 11-24 and 26-31 are pending in the instant application.

Claims 4-9 and 19-24 have been withdrawn from further consideration.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the claims, the application is in condition for allowance except for the following:

Claims 4-9 and 19-24, presently withdrawn from consideration and drawn to different special technical features under PCT Rule 13.2 are hereby cancelled.

Allowable Subject Matter

Claims 1-3, 11-18 and 26-31 are allowed.

The following is an examiner's statement of reasons for allowance.

Regarding Claims 1 and 14, the references of the Prior Art of record fails to teach or suggest the combination of the limitations as set forth in **Claims 1 and 14**, and specifically comprising "A phosphor mixture ... comprising: a first phosphor selected from a group consisting of an alkaline earth metal antimonate comprising a fluoroantimonate, and a derivative of the alkaline earth metal antimonate comprising a fluoroantimonate;

and a second phosphor selected from a group consisting of a manganese (IV)-activated compound comprising an antimonate, a manganese (IV)-activated compound comprising a silicate-germinate and a manganese(IV)-activated compound comprising an aluminate

and a third phosphor selected from a group consisting of a europium-activated silicate- germanate, and a sensitizer selected from a group consisting of Eu(II) and Mn(II) as a secondary activator ,and having an orange color, an orange-red color or a dark red color in a spectrum range over 600 nm" including the remaining limitations.

Regarding Claim 15, the references of the Prior Art of record fails to teach or suggest the combination of the limitations as set forth in **Claim 15**, and specifically comprising "wherein the phosphor mixture comprises:

a first phosphor selected from a group consisting of : an alkaline earth metal antimonate comprising a fluoroantimonate and a derivative of the alkaline earth metal antimonate comprising a fluoroantimonate; and

a second phosphor selected from a group consisting of manganese(IV)-activated compound, comprising an antimonate, a manganese(IV)-activated compound comprising a titanate, a manganese(IV)-activated compound comprising a silicate-germanate, and a manganese(IV)-activated compound comprising an aluminate;

and a third phosphor selected from a group consisting of a europium- activated silicate-germanate and a sensitizer selected from. a group consisting of Eu(II) and Mn(II) as a secondary activator and having an orange color, an orange-red color, a red color,

or a dark red color in the spectrum range over 600 nm" including the remaining limitations.

Regarding Claim 16, the references of the Prior Art of record fails to teach or suggest the combination of the limitations as set forth in **Claim 16**, and specifically comprising "wherein said phosphor mixture consists of:

a first phosphor selected from a group consisting of : an alkaline earth metal antimonate comprising a fluoroantimonate or a derivative of the alkaline earth metal antimonate comprising a fluoroantimonate;

and a second phosphor selected from a group consisting of a manganese(IV)-activated compound consisting of an antimonate, a manganese(IV)-activated consisting of a titanate, a manganese(IV)-activated compound consisting of a silicate-germanate, and a manganese(IV)-activated compound consisting of an aluminate;

and a third phosphor selected from a group consisting of a europium-activated silicate-germanate and a sensitizer selected from a group consisting of Eu(II) and Mn(II)) as a secondary activator and having an orange color, an orange-red color, a red color, or a dark red color in the spectrum range over 600 nm" including the remaining limitations.

Regarding Claims 2-3, 11-13, 17-18 and 26-31, they are allowable because of their dependency .

Examiner Note: Although the claimed phosphors exist individually in the Prior Art, there is no motivation in the Prior Art to provide the claimed three phosphor mixtures.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".
